Work experience

1. PT.TELKOM INDONESIA
Web Application
July 2023 - Now

- My duties include analyzing user needs, developing internal applications such as monitoring dashboards, and integrating between databases to ensure efficient and connected data flow.

2. PT APPINESTOPIA
Full Stack Developer
January 2022- July 2023

- I am responsible for creating the Kementrian Lingkungan Hidup dan Kehutanan (KLHK) website and applications using the React.js and Laravel frameworks, including designing the database, as well as building the necessary business logic and functionality.

3. CV SAMUDERA BIRU NUSANTARA
Web Developer
January 2021- January 2022

- My duties include designing, developing, and managing company profile websites to present corporate identity online, creating internal applications to support internal company operations such as human resource management or inventory management, and managing the company's server infrastructure to ensure availability, security, and optimal performance.
